Hobbies

During my free time I like to learn new things and tinker on projects.

I also enjoy reading, teaching, listening to music and consuming entertainment.

Profile

I'm a social and passionate software engineer that's not afraid to ask questions. My strongest programming language is JavaScript and favorite framework is React. I'm most knowledgeable in front-end development.

Familiar technologies

Languages
JavaScript - TypeScript - PHP - SQL

Libraries & Frameworks
React - Redux - Next - Laravel

Other tooling
Git - Node - NPM - Webpack - Rollup - Gulp - Babel - Pug / Jade - i18Next - Docker AWS - MySQL - Sass - CSS Modules - Styled Components

Professional experience

Software Engineer, Floorplanner, Rotterdam (Full-time)
OCTOBER 2019 — PRESENT

Floorplanner is an SaaS architectural visualization platform for drawing floorplans.

My stack: JavaScript - TypeScript - PHP - React - Git - Node - Lerna - Webpack Rollup - Docker i18Next - Sass - CSS Modules - Styled Components

• Worked on the Floorplanner Editor, Engine, Dashboard and a couple of websites.

• Maintained, tested, deployed and built some of the above mentioned products while continually reinforcing industry best practices.

• Responsible for implementing TypeScript in the codebase while refactoring many components and classes, removing dead code and fixing found bugs on-the-go.

• Increased build times of the editor and engine by 800-1000%.

• Worked closely with the CEO and occasionally the CTO, to discuss and implement new marketable features.

• Communicated with (enterprise) customers to discuss their issues, feedback and needs, and came up with effective solutions and implementation details.

• Effectively engineered & developed changes based on very specific specifications.

Software Engineer, CodeCrashers, Eindhoven (Freelance)
JANUARY 2022 — JANUARY 2023

CodeCrashers is an SaaS learning platform where students can view (programming) courses and make assignments, which are then reviewed by teachers,

My stack: JavaScript - TypeScript - PHP - React - Laravel - Git - Node - Webpack Sass - CSS Modules

• Worked on the CodeCrashers Viewer and logged-in Dashboard.

• Responsible for the maintainability, integration, architecture and development of the Viewer and Dashboard while keeping technical depth to an absolute minimum.

• Contributed to some courses & assignments, that are being used on the platform.

Intern supervisor, REA College Eindhoven, Eindhoven (Freelance)
OCTOBER 2022 — DECEMBER 2022

• Supervised and mentored interns for their internal CRM software project.
